

Logging/Timber

Independence Township requires an approved permit for all logging/timber harvesting operations for cutting blocks over five (5) acres. Links are provided to the Application, Fee Schedule and Ordinance. The Application must be completed in full, signed and the ordinance requirements must all be met. We will need to know if a roadside landing will be used. No Township roads may be used without providing a road bond to the Township and a temporary driveway permit issued. If a state road is to be used, you will need to contact PennDOT for their requirements. An E&S Plan must also be obtained from the local conservation authority.
