About 811 PA One Call

Building a deck? Planting a tree? Installing a mailbox? 811 is the new number you should call before you begin any digging project.

**Know what's below.
Call before you dig.**

A new, federally-mandated national "Call Before You Dig" number, 811 was created to help protect you from unintentionally hitting underground utility lines while working on digging projects. Every digging job requires a call – even small projects like planting trees or shrubs. If you hit an underground utility line while digging, you can harm yourself or those around you, disrupt service to an entire neighborhood and potentially be responsible for fines and repair costs.

- **If you are adding any type of drive that is joining into a township road, heavy hauling or making any alterations near a township road, please call to see what is necessary.**
